「MacBook Air」

2019/02/18
相田 太一

Introduction

I talk about MacBook Air. It is one of the most famous devices in Apple. In 2008, first MacBook Air was released as “The world’s thinnest notebook”. Recently, the new model was released on October 2018.

Body

One of the most famous features in this device is light and thin body. When the first speech, Steve Jobs picked it up from an envelope and proved new MacBook’s Thinness. 11inch model had only 1.06 kg weight and 1.7 cm thickness.

After 3 Series and 10 years, in 2018, new model was released. New MacBook Air has touch ID which makes your Mac unlock, locked documents or Apple Pay smoothly. This is only 1.25 kg weight makes daily use of MacBook more comfortable. And 2 Thunderbolt 3(USB-C) ports can connect everything. Furthermore, this is made with 100% recycled aluminum without mining any new aluminum from the earth. That environmentally friendly and powerful device can become your partner.

Conclusion

MacBook Air has been loved by everyone, and this new model make you fall in love again. And I am no exception. If I get a job, my initial salary may become MacBook Air.
